POWERFUL PROTOTYPES, WITHOUT CODING

DYNAMIC CONTENT

CONDITIONAL FLOW

ANIMATIONS

DATA DRIVEN

ADAPTIVE VIEWS

MATH FUNCTIONS

Create simple click-through diagrams or highly functional, rich prototypes with conditional logic, dynamic content, animations, math functions, and data-driven interactions without writing a single line of code.

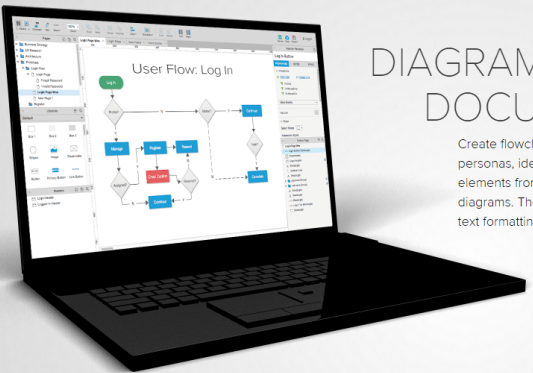

EASY TO SHARE

Click a button, and Axure RP will publish your diagrams and prototypes to Axure Share on the cloud or on-premises. Just send a link (and password) and others can view your project in a browser. On mobile devices, use a browser or the Axure Share App for iOS and Android.

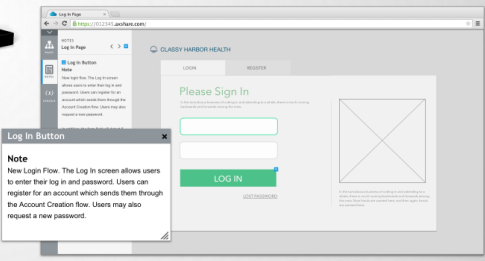

DIAGRAMMING + DOCUMENTATION

Create flowcharts, wireframes, mockups, user journeys, personas, idea boards and more. Quickly drag and drop elements from built-in or custom libraries to create your diagrams. Then, style it with fills, gradients, line styles, and text formatting.

Annotate your diagrams and prototypes to specify functionality, keep track of tasks, or store project information. Organize your notes into separate fields for different audiences. Choose which notes to present in the HTML or in an auto-generated Word document that includes screenshots.

EASIER TEAM COLLABORATION

Axure RP allows multiple people to work on the same file at the same time, making it easier for your team to work together. Create a "Team Project" on Axure Share or SVN and use a check-in and check-out system to manage changes. Team projects also keep a history of changes with notes for each check-in.

REVISION	DATE	AUTHOR	CHECK IN NOTE
9	4/4/2016 11:25:55 am	francisco@axure.com	"Improved login documentation for reading" ...more
